WORK EXPERIENCE

Software Engineer (Full-time) — 8MB LLC (Zagged) | Remote (New York, USA) June 2025 – Present

- Developed and scaled customized automation bots across **50+ Discord servers (30,000+ members)** for U.S. brands to manage onboarding, moderation, account setup, video submissions, payment submissions, and content checks of content creators, significantly reducing manual operations.
- Built an internal automation tool for email outreach and TikTok/Reddit scraping, scaling to over **60,000 emails/month** reducing SaaS costs, and enabling onboarding of over **1,500 UGC creators**.
- Developed a web application for the content lead, integrating Gemini with Discord bots to automate creator media generation and reducing SaaS costs by **60–70%**.
- Built a scraping-based tool for brand managers to automate counting of creator posts across social media, processing over **100,000 posts/month** and eliminating manual reporting.

Web Developer (Part-time) — TaxFirmSystems | Remote (Florida, USA) January 2026 – Present

- Strengthened security and data quality of dashboard through role-based permissions, password recovery, email verification, rate limiting, and sanitized webhook ingestion.
- Improved client onboarding and activation by building trial signup, verification, and access-control systems that supported a smoother path from prospect to active user.
- Automated lead delivery and assignment through dashboard authenticating webhook APIs, validation, sanitization, and email notifications, reducing manual handling and speeding up lead distribution.

SIDE PROJECTS

Google Maps Scraper & Website Contact Scraper

- Google Maps scraping tool built with FastAPI, Playwright, and SQLite, supporting concurrent searches across all **50 U.S. states** and collecting up to **5,000 raw listings** per nationwide run.
- Website contact scraper with HTTPX and Playwright that uses concurrent URL scanning, HTTP-first fetching, and browser fallback to efficiently extract emails and phone numbers from business websites.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, SQL
- **Frontend:** React, Next.js, Tailwind CSS
- **Backend & APIs:** Node.js, Express.js, Flask, REST APIs, FastAPI, Gunicorn/WSGI
- **Databases & Storage:** PostgreSQL, MongoDB, SQLite, Supabase
- **Infrastructure & Deployment:** Railway, Render, Vercel, Docker, SSH

EDUCACATION

Bachelor of Science in Information Technology
New Era University

June 2026
